worksheet.. pls return yr comment on white copy thankyou Harold

This drwg shows the flightpaths of two familiar WOUNDING HITS, their wound sequence & a schedule of WHEN WHICH shot was fired & HOW rifle location caused bullet to inflict wound (WHERE) it did.....
should you find this solution (expletive deleted):

a. sketch in flightpaths of your WOUNDING HITS · ONLY .. Tague's miss
b. re-list the sequence using wounds' given numbers
c. complete WHICH, WHEN, WHERE, HOW schedule

this polling of about 100 researchers when re-drawn as a consensus will be presented to proper committee freeing it concentrate on Congress' prime responsibility: WHO (dunnit?) & WHY?

appreciate this is low on your totem pole - but if might help free some to investigate who, why to invade fence and have you on the hook - you had a hand in it
